There was a very limited market for stocks in the forencom, and though the total sales of listed stocks up to 12 o'clock footed up 114,300 shares, the dealings were chiefly by board-room traders, with the object of making fractional profits by the fluctuations. Lackawanna and Reading were the most active, and both were \(\fomathcar{1}\) of the fluctuations. Lackawanna and Reading were the most active, and both were \(\fomathcar{1}\) of the fluctuations, because they were heavily sold short yesterday. At midday prices were irregularly changed, some being from \(\fomathcar{1}\) of 1\5 per cont. lower, and the remainder of the fist higher to a considerable extent. In a few instances there were even wider fluctuations. During the afternoon the market was dull and generally more active, but unsettled and irregular. Some of the list closed lower than the noon prices and others higher.

The sales to-day amounted to 319,802 shares.

## New York Produce Market

## THE WEAVER.

Beside the loom of life I stand
And watch the busy shuttle go;
The threads I hold within my hand
Make up the filling; strand on strand
They slip my fingers through, and so
This web of mine fills out apace
While I stand ever in my place.

One time the woof is smooth and fine And colored with a sunny dye; Again the threads so roughly twine And seave so darkly line on line. My heart misgives me. Then would I Fain loose this web—begin anew— But that, alas: I cannot do.

Some day the web will all be done.

The shuttle quiet in its place.
From our my hold the threshis be run;
And friends at setting of the sun
Will come to look upon my face.
And say: "Mistakes she made not few.
Yet wore perchance as best she knew."

-Mary Clark Huntington in The Independent

Professor E. Ray Lankester, having

recently expressed some doubts upon the alleged powers of a boy "water finder." who has been in the employ of the Grinton Mining company, in the north o Dr. McClure, has replied to them, deny ing emphatically that the boy, whos name is Rodwell, is an impostor. He says that the lad when tested never failed to either find water or minera veins, the lodes having always been found exactly at the places indicated The divining rod which he holds only moves in obedience to the muscular con tractions of his hands, and a rod of any kind of wood or even of any materia substance whatever can be used, pro vided it be a conductor of electricity Rodwell usually walks with his handtightly clasped before him, and as soon as he steps upon a mineral vein of water he is powerless to unclasp them until he moves away from the region of the lode or conduit. The lad is about 14 years of

## There are many wonderful transforma

tions in nature besides those which are common to the eye of the ordinary observer. Take for example the Medusa or common jelly fish. Born of the sea the young hydrozoon becomes primarily a distinct free germ, resembling a grain of rice, next a fixed cup having four lips. which subsequently turn to tentacles and it becomes a hyatine flower, which presently splits across the calyx into segments, whereupon it is made to resemble a pine cone crowned with a tuft of transparent filament. Now the cone changes into a series of sea daisies threaded on a pearly stock, and these one by one become detached and float away, each a perfect little Medusa with purple bill and trailing tentacles.—Hall's Journal of Health.

# A returned missionary, who has been

many years in Japan, has just been showing some curious effects of culture in that country. It seems that the secular education with great avidity. While only 7,000 children go to school where religious knowledge is a part of the curriculum, over 3,000,000 attended where the teaching is purely agnostic The young men develop a keen love fo metaphysical doctrine and research, but their favorite authors are Mill, Spencer, Darwin and Huxley. As this tendency is accompanied by a great demand for English teachers, however, one would think that the missionaries had the means of opposing it in their own hands.

# Little Child and Big Dog.

An amusing scene occurred on Essex street, near the Phillips schoolhouse, this noontime. Two large dogs, weighing perhaps 100 and 130 pounds respectively. engaged in a short and savage battle, which ended by the 100 pound dog retiring. Just as he turned tail a little girl about 6 years old rushed in on the scene, grabbed the 130 pound dog by the collar, kicked him in the ribs, cuffed

skinned a coon, or rather removed the coon from the skin through its mouth I considered a most remarkable one. This is no fish story; it is the truth. The operator removed the flesh and bones, even the bones of the tail, feet and fin

Case of Colonel THOMAS H. HOLT, Proprietor of the Granite Cotton Mills, Haw River,

N. C., and Lieutenant-Governor of the State.

From One to One and a Half Ounces of Calculi Passed Under the Action of the Water.

HIS CASE STATED BY E. C. LAIRD, M. D., HAW RIVER, AND FRED. S. WHALEY, M. D., RESIDENT PHYSICIAN AT THE SPRINGS.

COLONEL THOMAS H. HOLT, LIEUTENANT-GOVERNOR OF NORTH CAROLINA.

STATEMENT OF DR. LAIRD.

STATEMENT OF DR. LAIRD.

"The relief afforded by BUFFALO LITHIA WATFR to a patient of mine, Colonel Holt, of this place, a sufferer from ReNALCAUCULI, B., I think, worthy of some record. The list of May last he came under my care subject to frequent attacks of NFPHRITIC COLIC. It is to May last he came under my care subject to frequent attacks of NFPHRITIC COLIC. It is to the usual treatment for the relief of present suffering, I put him exclusively upon Bottalo Lithia Water, Spring No. 2, under the influence or which he in a few weeks a passed four tallula weighting from two to three grains each, which was followed by a dispassed four tallula weighting from two to three grains each, which was followed by a dispassed four tallula weighting from two to three grains each, which was followed by a dispassed four tallula weighting from two to three grains each, which was followed by a dispassed with the following results: Ten days after arrival ne began to discharge at intervals as everity, when he made a visit to the fundio Lithia Springs, where he used the water six weeks with the following results: Ten days after arrival ne began to discharge at intervals agradually diminished, until at the expiration of the six weeks, there was only occasionally, and barrely perceptible upon minute examination, a slight sindy deposit in the utine. At the same time improvement in the general condition of the patient was very marked.

The amount of a La UL-DES muter discharged may safely be estimated at few more to go me and a half ounces. Under microscopic examination it was evident, it link, that the VAL-UL-DES muter discharged may safely be estimated at few more to add that I was in constant attendance upon Colonel Holt during his strong from sections and normal.

It is proper for me to add that I was in constant attendance upon Colonel Holt during his strong at the springs.

STATEMENT OF DR. FRED. S. WHALEY, RESIDENT PHYSICIAN. STATEMENT OF DR. FRED. S. WHALEY, RESIDENT PHYSICIAN.

By F. C. Laird brought to me for analysis in June last three CALCULL which he informed me had been passed by Colonel Holt, of Haw liver. N. C. They were egg-shaped, hard, brown and weighed respectively two, two and a half and two and three-fourths grains, hard, brown and weighed respectively two, two and a half and two and three-fourths grains, hard, brown and weighed respectively two, two and a half and two and three-fourths grains, hard, brown and weighed respectively two, two and a half and two and three-fourths grains, hard, brown and weighed respectively two, two and a half and two and three-fourths grains, hard, brown and weighed respectively two, two and a half and two earter half of them showed marked facets Analysis proved these to be URIC ACID. The formation was in consentice tagers, and Tunab three analysis of one. One from the outer layer, one was in consentice tagers, and the number of the two the fourth is proved a URID ACID CALCULUS. My examinations were both chemical and interescooleal.

After this the persent came to the BUFFALO LITHIA SPRINGS, where, as resident physician was called in and saw him daily for about four weeks. He suffered from frequent attacks of NEPHRITIC Cold cand passed at foctor his large quantities of Chic ACID CALCULI. My belief is based on the following observations: 1st. That the CALCULI passed under the next opposite to the mask of the water are soft masked between the shapes. The SANE and fine particular to the calculus of this water are soft masked between the shapes. All of these at always proved a URID ACID CALCULI. My belief is based on the following observations: 1st. That the CALCULI passed under the next opposite to the masked between the shapes. The sane and the passed under the use of water) are not so well defined and presents with a takes. The sane and the calculus of this water are soft masked between the shapes. The sane and the same and

thus preserving the skin intact, which I brought home with me and am having it mounted by a taxidermist. The feat Leonaidered a most remarkable one.
